Work Experience

Fisher College

It intern

Jul 2025 - Present

boston, MA

- Provided technical support for hardware, software, and network issues.
- Managed user accounts in Active Directory, Azure AD, and Microsoft 365 Admin Center.
- Performed Windows workstation migrations, network printer setups, and Thunderbolt dock configurations (e.g., Dell WD22TB4) for seamless end-user hardware integration.
- Traced network cabling and mapped switch ports across access, distribution, and core layers to maintain infrastructure documentation.
- Installed and configured Power over Ethernet (PoE) devices and TouchView AV systems, ensuring robust classroom technology support.
- Handled ticketing and incident resolution in Spiceworks ITSM.

PROJECTS

Esports College Finder | Full-Stack Developer and AI chatbot integration

- Built a web directory for 500+ students to explore esports colleges by scholarships and region.

Podcast GenAI Solution | AI Developer

- Scraped, cleaned, and summarized podcasts using Python, Hugging Face, FAISS, and BART.

Portfolio Website | Frontend Developer

- Designed a 3D developer portfolio site with Tailwind CSS, TypeScript, Three.js.

ClutchEDU – In Progress | Mobile App Developer

- Developing a Tinder-style app matching students with nearby esports colleges using filters for scholarships, majors, and location.
